

# DURAFOOD

TECHNICAL DATA SHEET

Rev.02 – 10/05/2018

DURAFOOD is an inorganic cementitious plate impregnated on the surface with a silicon treatment in compliance with European standards that regulate the materials intended to come into contact with food. Available in standard size 2500x1250 mm or in custom-made plates

Thickness: 13,00 mm (+/-10%)

## BENEFITS:

- Good resistance to oils and fats
- Suitable for contact with food

## Suggests:

Preheating is recommended according to the specific table.

**Application: BAKERY**

## PROPERTIES

Density	g/cm <sup>3</sup>	1,8
Thickness	mm	13 +/- 1
Compressiv Strength 20°C	N/mm <sup>2</sup>	40
Coefficient Of Thermal Expansion		1x10 <sup>-5</sup> m/mK
Operation Peak Temperature	°C	400
Thermal Conductivity 275°C	W/m°K	0,9
Color	Grey / Red
